7. Now you can look at the tables you created. Click on the data icon and then click on Tables tab

The screenshot shows a database management interface. On the left, a sidebar menu has four items: 'Dashboard' (with a bar chart icon), 'Run SQL' (with a 'SQL' label), 'Data' (with a database icon and highlighted by a red box), and 'Administration' (with a key icon). Above the sidebar is a hamburger menu icon, also highlighted by a red box. The main area has a top navigation bar with tabs: 'Load Data', 'Load History', 'Tables' (highlighted by a red box), 'Views', 'Indexes', 'Aliases', 'MQTs', 'Sequences', and 'Application objects'. Below the tabs is a search bar labeled 'Find schemas or tables'. Under the search bar, a section titled 'Schemas' contains a table with two columns: 'Name' and 'Type'. The table has one row with the schema name 'MYG36304' and the type 'User'.

Name	Type
MYG36304	User

8. Select the Schema corresponding to your Db2 userid. It typically starts with 3 letters (not SQL) followed by 5 numbers (but will be different from the **MYG36304** example below). Then on the right side of the screen you should see the 5 newly created tables listed – DEPARTMENTS, EMPLOYEES, JOBS, JOB_HISTORY and LOCATIONS (plus any other tables you may have created in previous labs e.g. PETSale, PETRESCUE, etc.).

Find schemas or tables

Schemas

<input checked="" type="checkbox"/> Name	Type	Tables ▲
<input checked="" type="checkbox"/> MYG36304	User	5

Tables

<input type="checkbox"/> Name ▼	Schema
<input type="checkbox"/> DEPARTMENTS	MYG36304
<input type="checkbox"/> EMP	MYG36304
<input type="checkbox"/> JOBS	MYG36304
<input type="checkbox"/> JOBSHISTORY	MYG36304
<input type="checkbox"/> LOCATIONS	MYG36304

9. Click on any of the tables and you will see its Table Definition (that is, its list of columns, data types, etc).

View data

Exercise 2: Load data into tables

In this exercise, you will learn how data can be loaded into Db2. You could manually insert each row into the table one by one, but that would take a long time. Instead, Db2 (and almost every other database) allows you to load data from .CSV files.

The steps below explain the process of loading data into the tables you created earlier in exercise 1.

1. Download the 5 .csv files below to your local computer:

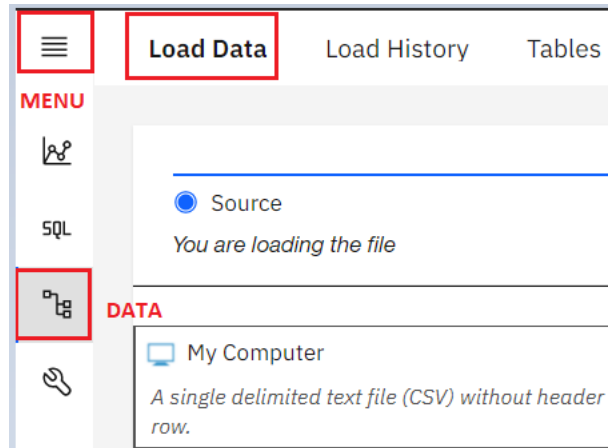

- [Departments.csv](#)
- [Employees.csv](#)
- [Jobs.csv](#)
- [Locations.csv](#)
- [JobsHistory.csv](#)

Note: For learners who are encountering issues with loading from .csv in Db2 using Firefox, they can download the .txt files and try with those:

- [Departments.txt](#)
- [Employees.txt](#)

- [Jobs.txt](#)
- [Locations.txt](#)
- [JobsHistory.txt](#)

2. In the Db2 Console, from the 3-bar menu icon in the top left corner, click **Load**, and then select **Load Data**.

3. On the **Load Data** page that opens, ensure **My Computer** is selected as the source. Click on the **browse files** link.

The data load job succeeded.
You can now work with your data.

10. 1. 1
 1. Click on the **Tables** tab and then select the **EMPLOYEES** table and then click on **View data**.

Copied!

The screenshot shows a database management tool interface. At the top, there are tabs for 'Load Data', 'Load History', 'Tables' (highlighted with a red box), 'Views', 'Indexes', 'Aliases', 'MQTs', 'Sequences', and 'Application objects'. Below the tabs is a search bar labeled 'Find schemas or tables'. On the left side, there is a sidebar with icons for 'Schemas', 'SQL', and other database objects. The main area displays a list of tables under the 'Tables' tab. The list has columns for 'Name', 'Schema', and 'Properties'. The 'EMPLOYEES' table is selected, indicated by a red box around its row. To the right of the table list is a 'Table definition' panel for the 'EMPLOYEES' table, showing columns and their data types. At the bottom right, there is a blue 'View data' button highlighted with a red box. The status bar at the bottom indicates 'Total: 5, selected: 1'.

Name	Schema	Properties

E1009	Andrea	Jones	123414	1990-07-09	F	120 Fall Creek, Gary,IL	234	7000
E1010	Ann	Jacob	123415	1982-03-30	F	111 Britany Springs,Elgin,IL	220	7000

12. Now it's your turn to load data to the remaining 4 tables of the HR database – **LOCATIONS**, **JOB_HISTORY**, **JOBS**, and **DEPARTMENTS** from the remaining source files.
13. Click **Load More Data** and then follow the steps from **Step 3** above again to load the remaining 4 tables.
IMPORTANT Make sure you perform the steps in **Step 7** for each of the 4 remaining file loads.

Congratulations! You have completed this lab, and you are ready for the next topic.
